The *Journal* is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/89/$5.00 + .00

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published by the Cambridge University Press in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £38 net (US $75 in the USA and Canada) plus postage. The subscription price in the UK (which includes postage) to volumes 198–209, 1989, is £410, £450 elsewhere (US $880 in the USA and Canada) for institutions: £225 (US $450) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 510 North Avenue, New Rochelle, NY 10801.

Volume 199 February 1989

CONTENTS

Numerical simulation of thermal convection in a two-dimensional finite box. Isaac Goldhirsch, Richard B. Pelz and Steven A. Orszag *page* 1

The growth of compositionally stratified solid above a horizontal boundary. Andrew W. Woods and Herbert E. Huppert 29

Numerical simulation of the absolutely and convectively unstable wake. K. Hanneman and H. Oertel Jr 55

Multiple-contour-dynamic simulation of eddy scales in the plane shear layer. P. A. Jacobs and D. I. Pullin 89

Edge waves on a gently sloping beach. John Miles 125

The effects of boundary imperfections on convection in a saturated porous layer: near-resonant wavelength excitation. D. A. S. Rees and D. S. Riley 133

Linearized dynamics of spherical bubble clouds. Luca D'Agostino and Christopher E. Brennen 155

The motion of a finite mass of granular material down a rough incline. S. B. Savage and K. Hutter 177

The effect of a weak vertical magnetic field on the buoyancy-driven flow past a vertical heated wall. Oliver S. Kerr and A. A. Wheeler 217

Semi-preserving development of a slightly heated free swirling jet. J. W. Elsner and L. Kurzak 237

Onset of Rayleigh–Bénard convection in a rigid channel. M. S. Chana and P. G. Daniels 257

Shock splitting in single-phase gases. M. S. Cramer 281

Effects of heat release on the large-scale structure in turbulent mixing layers. P. A. McMurtry, J. J. Riley and R. W. Metcalfe 297

Effects of heat release in a turbulent, reacting shear layer. J. C. Hermanson and P. E. Dimotakis 333

Selective withdrawal and spin-up of a rotating stratified fluid. S. G. Monismith and T. Maxworthy 377

Numerical simulation of boundary-layer transition and transition control. E. Laurien and L. Kleiser 403

Frequency selection and asymptotic states in laminar wakes. George Em Karniadakis and George S. Triantafyllou 441

Surface wave mode interactions: effects of symmetry and degeneracy. F. Simonelli and J. P. Gollub 471

Symmetry-breaking bifurcations in resonant surface waves. Z. C. Feng and P. R. Sethna 495

A theoretical and experimental study of double-layer convection. S. Rasenat, F. H. Busse and I. Rehberg 519

Measurements of heat transfer in separated high-enthalpy dissociated laminar hypersonic flow behind a step. S. L. Gai, N. T. Reynolds, C. Ross and J. P. Baird 541

Choking of liquid flows. S. M. Richardson 563

Experiments and analysis of upstream-advancing solitary waves generated by moving disturbances. Seung-Joon Lee, George T. Yates and T. Yaotsu Wu 569
